JONATHAN CHAMBERS V.COM

A Visual Companion Sample

Jonathan Chambers and The Ankh Deception

SAMPLE DOCUMENT

Beyond the Page

This sample demonstrates how a downloadable document could appear inside the Jonathan Chambers Visual Companion. It is intentionally non-spoiler-specific and is designed to test the presentation of documents, imagery and supporting text within V.Com.

The final documents can be tailored to individual chapters and may include fictional records, research notes, location material, photographs, diagrams, correspondence or other items that deepen the reader's experience without revealing later events.

Visual Reference

A world beyond the printed page

The Visual Companion provides a controlled space for material that would be difficult to reproduce within the novel itself. A reader can finish a chapter, open the matching V.Com page and explore only the material that is safe at that point in the story.

"Read the story first. Explore the world when you are ready."

Example uses for a V.Com document

01	**Story artefacts** Documents or records referenced by the narrative.
02	**Location material** Maps, photographs and visual references connected to a chapter.
03	**Behind the story** Context, research and creative notes that expand the reading experience.
04	**Archive material** Additional files that can be revealed at the appropriate point in the reader's journey.

V.Com Sample Only

This document is a design and functionality sample for the Jonathan Chambers Visual Companion. The imagery and text on these pages are placeholders and are not intended to establish story canon or reveal plot information.
